“We are getting better gradually, though thousands of its aftershock which are both big and small are still happening. This is really making us scared. Very terrible thing happened in Nepal on 25th April. We cannot even imagine the situation.

Mother, sister, me and my aunt were at home whereas father was not at home. We experienced that terrible earthquake in home whereas our father experienced outside on his way to Durbar Marg. Many of the people are homeless. Many property and all the beauty has been turned into soil.

Let's hope that everything will be fine and also let's pray for that. ”

Shristika 15 Jahre:

“Dear All, we learn the meaning of Earthquake from school: *“the trembling of the earth due to the movement of tectonic plates is called Earthquake. It is a natural disaster and it is not created by the human and cannot be stopped by the human.”*

Earthquake was like fairytale in the past but now it is real in everyone's eyes.

Earthquake occurred in Nepal and caused great destruction to the country.

It occurred on 25th of April. On that day, everyone in the family were at the home expect our dad. He had went to the office early in the morning. My mom cooked food little bit late than the usual time because it was

Saturday. We had invited our aunty for the lunch. After she came we had our lunch and started talking. While my mother, sister and aunty were in the kitchen, I went to the guest room and started brooming. In a minute all the things kept in the room began to shake. I became amazed but when I felt that the land was also shaking then I ran towards the kitchen. Then we all sat under the door of our kitchen. The earthquake lasted for 2.15 Minute? [some people told me] only but it became a very long to me and my family maybe to the other people too. After the trembling stopped we went to an open place. At that time all the people had already gathered there. Again the earthquake came. We caught each other's hand and prayed for the God. Then my dad also came in the spot. Then we all family were all together.

That day earthquake came in the interval of 5 minutes and people afraid and worried. Then we thought not to stay inside the house over night and stayed outside the house

.... Earthquake has taken lives of people, cultural heritage, houses, temple, land, mountain, snow peak, ambulance, electricity etc. We cannot simply imagine how much has been destroyed....

.... Temples are cracked, the roofs of the temples are gone. The Boudhanath Stupa is also cracked. So we can see the lifestyles of people greatly affected by the earthquake. Because of this incident, both rich and poor people have come in same standard. On the day of the earthquake, both standard of of people had to leave their house and sit on the open ground as their home and sky as their roof. the cities are like dead cities now. **The word earthquake means death now.**

So the april 25, 2015 is considered as **the black day of Nepal** because it took the natural beauty, villages, lives of people, houses, cultural heritage of Nepal. It brought everflowing tears in the eyes of Nepalese people.
